

About Me

I'm Balaji, a web developer with six months of experience. My journey started with a curiosity for crafting digital solutions using HTML, CSS, and JavaScript. I'm enthusiastic about creating seamless user experiences and have recently delved into the world of React.js. During my time at GR Infotech, I've contributed to refining my ability to collaborate and deliver results. I'm a problem solver at heart, always seeking innovative ways to merge aesthetics with functionality.
